OBJECTIVE

Dedicated and motivated web developer with experience in React and Angular, seeking an opportunity to contribute my skills and passion for web development to a dynamic team.

TECHNICAL SKILLS

- Tools: Windows, Mac OS, Office 365, Active directory
- Programming Languages: HTML, CSS, JavaScript, TypeScript, ReactJS, AngularJS , NodeJS, Firebase
- Developer Frameworks: Visual Studio Code, Postman, Google, PyCharm, Firebase Console, MYSQL Workbench
- Version Control: Git, GitHub
- Package Managers: npm, yarn
- Responsibility of designing and developing responsive web-based applications along with Admin Panel based on client's requirements.
- Attention to detail and ability to multitask while talking to customers.
- Exposure in working with DBMS and MS SQL to modify and maintain the data in the backend.
- Familiarity with version control systems like Git and CI/CD.
- Skilled in debugging and troubleshooting web applications.
- Excellent Problem-Solving and analytical skills.
- Knowledge of cloud platforms like AWS, Azure, GCP.

PROFESSIONAL EXPERIENCE

1. Full Stack Developer at Native Software, India (September 2021 – July 2023)

- Designed and created a knowledge management platform using technologies like NodeJS, TypeScript, JavaScript, ReactJS and AngularJS.
- Building components, hooks, and events in ReactJS
- Working in NodeJS to establish backend connection for web-based application.
- Hands on experience of CRUD operation, Filter data, uploading images and sending notifications from Firebase using FCM Token in both foreground and background.
- Build a responsive and creative website, admin panel, and web application using HTML & CSS.
- Always played a key role in the development activities carried out within team, improve the web design as per clients' expectations, and maintain the standard for developed web application.
- Integrated third party APIs.

2. Front-End Developer at Native Software, India (September 2020 to September 2021)

- Coordinate with a team of five web developers to design scalable database applications for clients.
- Conducted code changes in HTML and CSS and developed stems to import 1M records into a new database.
- Developed and maintained responsive and user-friendly websites, which resulted in increase in user engagement.
- Utilized front-end libraries and frameworks (e.g., React, Angular) to enhance user interfaces and improve overall user experience.
- Implemented back-end solutions to support client-side functionality, including RESTful APIs and database integration.
- Developed rigorous test cases to ensure delivery of bug-free code.

ACADAMIC DETAILS

Graduation: Bachelor of Computer Science Engineering

University: SN Patel Institute of Technology & Research Centre

Year: 2020

ACADAMIC PROJECTS

1. Automatic Timetable Developer

The system is made for university faculty members to automate their scheduling by entering course workload and availability to sync with other faculty members.

2. Drink And Drive Alcohol Detecting System

In this project, the MQ3 sensor detects the exhalation of the driver which is kept on the steering wheel. If it detects, it stops the ignition of the car and sends the message of the driver's location to a family member via the driver's phone.
